Training prices are calculated based on the basic number of flight hours prescribed by the syllabus.

If there is no note for the type of training "only on LK..." training is provided at both airports, in Benešov and in Brno
 In addition to the stated prices, landing fees will be re-invoiced according to the AIP CR for airports on which the above-mentioned types of training and approach fees of ATC will be carried out.

All prices listed in these calculations are based on the valid LŠ BemoAir price list for 2023 and on supplier prices

A quantity discount, if applicable as "Time Building", i.e. > 10 hours, is already included in these calculations.

All the above prices are w/o VAT, charged according to the valid tariff of the Ministry of Finance of the Czech Republic.

Note: A fuel surcharge (FS/PAP) will be added to the listed prices, determined according to the current price list, which is determined by the aviation fuel prices, especially for LKBE and LKTB (already indicated in the calculations)
